SUGGESTED DEBRIEFING TRIGGERS

TRAUMA RESUSCITATION

- Triage Category 1
- Massive Transfusion Activation
- Thoracotomy

MEDICAL RESUSCITATION

- Cardiac Arrest
- ECMO CPR
- Difficult Intubation
- Complex Resuscitation

OTHER

- Staff Requesting
- Complex patient &/or Staff Interactions

SET THE SCENE

- We are going to have a short team debrief (5-10min).
- Your participation is welcomed but not compulsory.
- The purpose is to improve the quality of patient care & our team performance.
- This is not a blaming session and we should focus on the team issues.
- Information discussed during this debrief is confidential (de-identified data and learning themes may be used for audit and department education)
- You may be contacted by text or email from a senior clinician as part of our Peer Support Program. Please advise if you do not wish for this to happen.

REACTIONS

ASK:

Is Everyone Ok?
How Are You Feeling?

SUMMARISE

TEAM LEADER:

Please Share a Short Summary of the Case

ANALYSIS

ASK:
OVERALL, WHAT WENT WELL & WHY?

Think About Performance Domains:
Human Factors
Technical/Equipment Issues
System Issues

ASK:
OVERALL, WHAT COULD BE IMPROVED & WHY?

KEY POINTS

ASK:

Identify the Key Take Away Points for this Case
Are There Any Issues That Need Immediate Follow-Up? (Identify Key Person Responsible)

SCRIBE

- Use Online Form (QR Code Above or Link on PC Desktop)
